Solvent:	yes
UV-curable:	yes
Latex:	yes

### Description:

EMBLEM SOBBO800FR is a special coated, calendered PVC-banner for digital printing with solvent and eco-solvent inks.

The main field of application is the production of promotion banners for medium and long term outdoor advertisements.

The black barrier in between guaranties high opacity which makes it able to cover nearly every backdrop.

The SOBBO8000FR can be eyed, glued and sewed. During finishing the user has to make sure that adequate tools are used. Furthermore it is necessary that eyes are placed in a distance which is proportionated to the expected wind load and own weight of the banner.

For assembling of different banner parts or edge reinforcement we recommend to use the special EMBLEM tapes.

### Small print

Because of the great number of potential influences at object time and applinace of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
