Description:

EMBLEM Solvent Backlit Paper is a white, semimatt paper for solvent based inks. Because of the homogeneous paper structure, it is an excellent media for lightbox applications. It is also usable for posterprints and superior prints because of its high grammage and stiffness for indoor- and outdoor-use.

The specific surface permits a notable ink coverage and extreme brilliant colours. So it is the perfect media for superior prints.

Typical Application:

Lightbox, posterprint

Because of the great number of potential influences at object time and applinace of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
