Length of roll:	35m
Flame retardant acc. to:	no
Compatible inks:	
Eco solvent:	yes
Solvent:	yes
UV-curable:	yes
Latex:	yes

Description:

EMBLEM Solvent PopUp Film is a glossy coated white polyester film for brilliant print-outs with solvent and ECOSolvent inks.

The special composite of the basic material assures an optimum flatness and very good rigidity. The internal blockout layer provides a high opacity.

Depending on the used ink-quantity and ink-type and the remaining solvents in the print the dryingtime and the evaporation can delay noticeable. In certain circumstances it is possible that the mechanical load is only reached after 2 or 3 days. We recommend in any case to print without the rewinder and lay the prints out for drying. When the recommended time between printing and winding is not adhered, it is possible that the windings stick together.

To protect the prints from abrasion the use of lamination film is advisable. Moreover we recommend to wear cotton gloves to avoid finger prints.

Small print

Because of the great number of potential influences at object time and applinace of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
