Length of roll:	25 meters
Flame retardant acc. to:	yes acc. to DIN 4102
Compatible inks:	
Eco solvent:	yes
Solvent:	yes
UV-curable:	yes
Latex:	yes

Description:

EMBLEM SOFLA3 is a textile for flag-application using solvent inks with good print-through effect. This fabric is optimized for so-called eco-solvent inks like Roland "SolMax" and Mutoh "Eco-Ultra"-inks.

Because of a better handling SOFLA3 has been laminated on a release paper. The material is 100% polyester. For confection we recommend: hot cut, sewing/hemming.

It is necessary to wait 24 hours after printing before putting the flag outside to make sure that the ink is dry and the print became water proofed.

After printing it is not required to remove excessive ink by washing.

To avoid fingerprints it is advisable to wear cotton gloves.

Small print

Because of the great number of potential influences at object time and application of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
