Flame retardant:	yes, acc. DIN 4102-B1

#### Description:

EMBLEM SOGVT260FR is a printable textile. The fabric is made of 100% PLA.

PLA (polylactic acid) plastic is biocompatible and is made of renewable resources. The biodegradation of PLA takes only some month under industrial composting.

Associated with the silk-mat surface this media allows high-quality prints with extra intensive colours and very good contrasts. The coating of SOGVT260FR especially made for inks like eco-solvent, solvent, UV-curable and latex.

The fabric is firm and so useable for displaysystems. The material is sewable and can be eyed. During the finishing you have to ensure that adequate tools are used. Furthermore it is necessary that eyes are placed in a distance which is proportionated to the expected wind load and own weight of the banner.

#### Typical Applications:

Banners at fairground, displaysystems, presentations, indoorbanners

Because of the great number of potential influences at object time and applinace of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
