Description:

SOME2 is a net polyester/banner for digital printing on printers which use solventbased inks.

Main fields of application are short- or medium-term promotional messages and outdoor appliances.

This medium is used with scaffolds. Due to its net-like structure the wind can partly pass through and there is less noise exposure than there is to canvas cover.

From a frontal view a transparency of 30 - 40% is given.

This EMBLEM solvent medium has been laminated with a clear polyester substrate to avoid spots of ink on the printer.
