BubbleJet Pigment:	yes
Piezo Dye:	yes
Piezo Pigment:	yes
Piezo Öl:	no
Piezo Eco Solvent:	no
Piezo Solvent:	no
Flameretardant:	no

Description:

EMBLEM WARF is a special coated PET-film with a good flatness. The high opacity comes from the silver-grey back side. The microporous coating supports waterbased ink. The prints are featured by minor reflections and brilliant colours and very good contrast.

Every print which has been produced with dye-based ink has to be laminated to protect it against gas-fading. To avoid mechanical influences lamination is advisable at all.

Before lamination the print has to be completely dry, otherwise there is the risk of lumps. The lamination may have influences on the flatness of the film.

The lamination can be done right to edges or over the edges. The user should be check before using what is more appropriate.

For the prevention of fingerprints it is advisable to use cotton gloves.

Applications:

RollUps, displays, posterprints, signs

Because of the great number of potential influences at object time and appliance of the above-mentioned materials, on which we have no bearing, test prints have to be effected by the user himself. A legally binding warranty can not be deduced from our specifications. Every liability and warranty that goes beyond the warranty of the product amounting to the product's value as well as entitlements to damages are excluded.
